Mahidol University	**Course:**	**ITLG301 - Communication Strategies for Professional Life, Fall 2026**
	Document:	**IT PORTFOLIO**

Assessment:
You are required to set up an IT portfolio platform that you will keep updating during your time at university and beyond.

An IT portfolio is a collection of your academic and professional materials that you have done during your time at university and beyond. It showcases your skills in action, your experience, and your expertise through real-life examples. It is more comprehensive than your resume. By looking at your portfolio, your future employer or client can get a feel of what you bring to the table and who you are as a professional, so it is important to show the skills you gained at university and your achievements.

Choose one of the following primary portfolio platforms and link your other professional evidence to it where appropriate:

1. **A website**
2. **PowerPoint**
3. **GitHub**
4. **LinkedIn**

PROCESS & SUBMISSION REQUIREMENTS

In **Week 11 (Lesson 9)**, you will work in pairs to provide and receive constructive feedback on your résumé and IT portfolio. Based on the feedback you receive from your partner as well as from your instructor, you will improve your IT Portfolio for final submission.

Prior to **Week 13**, you should submit your completed IT Portfolio to MyCourses along with your final version of your résumé.

Your IT Portfolio does not have to be perfect, and you may not have a lot of information now, but it needs to be a platform that you can update at a later stage during your study. Some sections, for example, competitions, may not be applicable to you yet.

If you do have information to add, add as much as possible so that you can get feedback on your content.

Please include the following Sections:

1. **Personal Brand Story:**

Write out the Personal Brand Story.

2. **Education and Work History**

Keep a running list including:

- University
  - Relevant IT/professional courses
- High School (optional)
- Other Courses (e.g. Coursera, etc.)
- Work (Part-time, Freelance, Full-time, Volunteer)

3. **University and Work Project Samples**

Add your class, work, and competition projects with

- Descriptions of the project
- Tools, skills, languages, techniques used (e.g. Blender, ER Diagram, Python, Use Case Modeling)
- Roles played (e.g. UX/UI designer, Backend developer)
- Evidence (screenshots, demos, links, etc.)

4. **Competitions**

If you did not take part in any competitions yet, you do not need to create an empty section. Add it as your portfolio develops.

5. **Workshops (if applicable)**

Keep a running list of workshops that you participated in

6. **Certifications and Certificates (if applicable)**

If you do not have any certifications or certificates yet, you do not need to create an empty section. Add it as your portfolio develops.

- You could include language proficiency test scores as well (IELTS, TOEIC, JLPT, HSK, etc.)

7. **Skills Inventory**

List all your professional skills:

- Programming languages
- Database tools
- Soft skills
- Business analysis
- Languages (Thai, Chinese, English, etc.)

8. **Resume**

Add your resume.

9. **Important links**

Add your professional links, such as LinkedIn Profile, GitHub, Personal Website, etc.
